

PURPOSE

To provide information about chain lubricant for Harrington's powered chain hoists.

SCOPE

This information applies to all capacities of Harrington's powered chain hoists.

INFORMATION

A. CHAIN MAINTENANCE/LUBRICATION

General: A critical part of hoist maintenance is lubrication of the chain. To maximize the chain's service life, ***proper chain lubrication is essential*** (consult the Owner's Manual for instructions). Harrington's recommended chain lube is available in a tube with special applicator for ease of application.

Part Number: ER1BS1951 (quantity of 1 tube of chain lube).

B. ALL NEW ER, NER, AND SNER HOISTS HARRINGTON DELIVERS

- Each chained hoist is supplied by Harrington with its chain fully lubricated.
- As the ER, NER, and SNER is Harrington's premium line of powered hoists, each new hoist, whether it is chained or unchained, comes with 1 tube of chain lube.

C. ALL OTHER NEW OR USED/REFURBISHED POWERED HOISTS HARRINGTON DELIVERS

- Each chained hoist is supplied by Harrington with its chain fully lubricated.
- No tubes of chain lube are included.

D. BULK CHAIN

Bulk chain is supplied fully lubricated, and no tubes of chain lube are included.

E. HOISTS IN SERVICE

General: When end-users perform chain lubrication as part of hoist maintenance, they are encouraged to procure and use Harrington's recommended chain lube (see A above).

Coverage: When applied to the inner ends and outer shoulders of each link, 1 tube of lube will cover 40 to 50 linear feet of chain for all of Harrington's chain sizes.

END
